ENVIRONMENT POLICY

Officina Meccanica Aldo De Tomasi

aware of the harm that a bad corporate management can hold against our environment, vows to take every concrete action to protect it and prevent any kind of emission that is bad to our ecosystem and own health, to pursue a consistent growth in terms of environmental performance.

The main goals of this policy are:

- The respect of environment laws and rules, of all the obligations linked to authorizations or permits given by authorities and every other requirement;
- The production of goods with a low environmental impact;
- The reduction, recycle and reuse of waste material;
- The prevention to lower the risk of environmental accidents
- The protection of any waterbody both on the ground and underneath;
- The research for implants and processes to improve the environmental protection;
- The reduction of natural resources waste and the improvement of their use;
- The prevention for pollution in the atmosphere;
- The education and promotion of any act towards the protection of the environment inside the company;
- The collaboration with the neighbourhood, the authorities, the clients, the suppliers for the promotion of a culture that benefits the environment;

These goals find their application in improvement strategies that are set and periodically discussed by our management.

Our management vows to apply this policy and educate the staff inside our corporate reality and, if possible, to extend this to the suppliers to unify their policies with ours.

Lonate Pozzolo, 14/01/2019
